EDUCATION

• National Taiwan University, Department of Electrical Engineering

expected graduation: Jun.2028

Bachelor's Degree

Taipei, Taiwan

- GPA: 4.26/4.3, Ranking: 4/182
- Related coursework: Computer Programming, Cornerstone EECS Design and Implementation, Algorithms, Reinforcement Learning, Deep Learning for Computer Vision.
- Self-taught: Machine Learning, Applied Deep Learning.

PROJECTS

• RecoveryDagger: Query-Efficient Online Imitation Learning Through Recovery Policy

Sep.2025 – Dec.2025

Skills: Reinforcement learning, imitation learning, Risk-Aware Control. Tools: Gymnasium

- 3rd place among 30 teams in Reinforcement Learning course's final presentation.
- Proposed a query-efficient online imitation learning framework that augments Dagger.

• Automatic Color Mixer

Feb.2025 – Jun.2025

Tools: C++, Python, Raspberry Pi, Hardware tool operation skills (such as soldering and wiring)

- 1st place & Popularity Award among 21 teams in Cornerstone EECS Design and Implementation course.
- Built an end-to-end sensor-to-actuator color mixing system (C++/Python), integrating calibration, control logic, and a UI for real-time feedback. Implemented color prediction using Mixbox + Kubelka-Munk.

• Robot Learning Lab

Sep.2025 – Present

Advisor: Professor Shao-Hua Sun (NTU GICE)

- Attended Robot Learning Lab group meetings; followed discussions on reinforcement / imitation learning and robotic manipulation.
- Interest: Real-to-sim transfer for robotic learning, embodied vision.

• Attack Analysis of NTU Campus Access Control Systems

Apr.2026 – Jun.2026

Tools: Threat Modeling, Network Security

- A final project for Cryptography and Network Security, testing the security of National Taiwan University's campus access control systems and proposing mitigations for identified vulnerabilities.

• NTUEE Light Dance: Front-End Developer

Nov.2025 – Present

Tools: Python, Blender

- Developed the front-end interface for the Light Dance performance at NTU EE Night

SKILLS

• Programming Languages:

- Languages: C++, Python, MATLAB; ML/Frameworks: PyTorch, NumPy.
- Tools: Git workflow, Linux, Docker, RL Gymnasium

• Language:

- Chinese (Native), English (C1), Japanese (B1), French (A1)
- IELTS: 7.5 (Listening: 8.0, Reading: 8.0, Writing: 7.0, Speaking: 7.5)
- TOEIC Listening & Reading: 950/990; TOEIC Speaking: 190/200; TOEIC Writing: 200/200
- JLPT N3 (Dec.2024)

• Leadership & Engagement

- President of the NTU Electrical Engineering Student Association.
- Campus involvement: band performance, dance/light-dance team, women's basketball.
- Teamwork: clear communicator; collaborated effectively across multiple activities and course projects.

HONORS AND AWARDS

• Dean's List Award

Apr.2025 & Oct.2025

Awarding Institution: National Taiwan University

- Honored twice for ranking in the top 5% of class in 113-1 and 113-2 semesters

• NTUEE Undergraduate Innovation Award - 2nd Place

Jun.2025

Awarding Institution: NTUEE

- Awarded for the "Automatic Color Mixer" project submission
